

Pricing Guide

The cost of a denture will vary depending on an individual's needs. Dentures are customized to fit each individual and no two dentures are the same. There are numerous factors which may impact the cost of your denture including material, mouth shape, partial or complete dentures. Every mouth is different and the complexity of each denture will vary depending on each individual's situation. This is why it is important to have a proper consultation, so we can accurately assess your needs.

During our consultation we will be able to properly advise you. This will include what type of denture you will require and guidance on keeping your new denture properly maintained. Part of our consultation will be to determine which of the following options works best for you:

Processed Reline Dentures

- Reshape your current denture
- Same day relines - 2 appointments
- New Impressions taken
- \$400 approx

Standard Denture

- Ivoclar composite teeth
- Custom tray impression
- \$1400 approx (full denture)

BPS Denture

- Long lasting & life-like natural looking
- Phonares teeth
- Better Fit, Ivocaped processing method
- Stain & Odor Resistant
- \$2200 approx (full denture)

Implant Dentures

- Superior support and stability
- Highest level of comfort
- Improved speaking ability
- Support jawbone structure

Depending on what option is best for you, there is a wide price range, anywhere from \$400 - \$2200. Given the complexity of creating custom dentures it is difficult to give an accurate quote over the phone. This is why an in-person consultation is important.
